Creation of Technical Working Groups (TWGs) on Continuing Education and Sectoral Statistics

Rationale

The Central Visayas Regional Statistics Committee (CV-RSC) continually commit to enhance the statistical system in the region to address more effectively the statistical requirements and the demand for data to support development planning at the regional and local level.

Likewise, the CV-RSC aims to build a strong statistical coordination mechanism among the regional line agencies and local government units, such that the region can cope with the emerging demands of statistics and other metadata relevant for an evidenced-based decision and policy making.

To properly account and take into consideration the strengths and weaknesses of our data providers and assess the data needs of our data users, it is therefore timely and relevant to create task force by which expertise of the members could help in improving the statistical system in the region.
