SPECIAL RELEASE

TECHNICAL NOTES

This Goat Situation Report presents the goat industry in terms of volume of production and inventory by farm type. The report is prepared to serve as a ready reference for PSA's various clients and stakeholders in the agriculture sector. It is released quarterly; that is, every February, May, August, and November.

Concepts and Definitions

Volume of production refers to the volume of locally-raised goat disposed for slaughter including those which were shipped out to other regions/provinces for slaughter. This is expressed in metric tons, liveweight.

Inventory refers to the actual number of goat present in the farm as of a specific reference date. For this report, the inventory of goat is as of 01 January 2021 since the surveys for this commodity are conducted semi-annually, i.e., January and July
