

SPECIAL RELEASE

CARABAO SITUATION REPORT in Central Visayas October-December 2021 Preliminary Result

Date of Release: 19 April 2022
Reference No.: 2022-SR07-012

The total carabao production of Central Visayas from October to December 2021 was estimated at 1,785 metric tons, liveweight. This was 58.3 percent higher than the previous year's same quarter production of 1,128 metric tons. *(Figure 1 & 2 and Table 1)*

P- Preliminary

Among all regions, Western Visayas accounted the highest production with 4,446 metric tons, liveweight followed by Eastern Visayas with 4,013 metric tons, liveweight. The other top producing regions were CALABARZON, 3,617 metric tons, Davao Region, 3,214 metric tons and BARMM, 3,100 metric tons. These five regions shared 49.5 percent to the country's total carabao production. *(Fig. 3 and Table 1)*

Meanwhile, CAR accounted the lowest production of 362 metric tons, liveweight, this quarter. *(Figure 3 and Table 1)*

SPECIAL RELEASE

TECHNICAL NOTES

This Carabao Situation Report presents the carabao industry in terms of volume of production and inventory by farm type. The report is prepared to serve as a ready reference for PSA's various clients and stakeholders in the agriculture sector. It is released quarterly; that is, every February, May, August, and November.

Concepts and Definitions

Volume of production refers to the volume of locally-raised carabao disposed for slaughter including those which were shipped out to other regions/provinces for slaughter. This is expressed in metric tons, liveweight.

Inventory refers to the actual number of carabao present in the farm as of a specific reference date.
