CEBU PROVINCIAL STATISTICAL OFFICE

SPECIAL RELEASE

May 2022 Consumer Price Index (CPI), Inflation Rate (IR), Purchasing Power of Peso (PPP) in Mandaue City

Date of Release: 09 June 2022, 9:00 AM Reference No. 2022-SR22-007

Starting February 2022, the Philippine Statistics Authority (PSA) released the rebased Consumer Price Index (CPI) for all income households to base year 2018, from base year 2012 as announced in the press release number 2022-01 dated 04 January 2022. The CPI series for all income households for January 2022 onwards will be 2018based.

Inflation rate in Mandaue City decelerated in the month of May 2022

The inflation rate in Mandaue City continued its downward trend as it decelerated further to 3.2 percent in May 2022, from 3.3 percent in April 2022. Inflation rate in the city is lower compared to the inflation rate in Central Visayas at 5.3 percent in the same period. The average inflation from January to May 2022 remained at 3.7 percent. (See Table A.)

In Percent (2018=100)				
Area	May 2021	April 2022	May 2022	Year-to- date*
Central Visayas	2.3	5.4	5.3	5.2
Mandaue City	1.8	3.3	3.2	3.7

The decrease in the inflation in Mandaue City is driven by Alcoholic Beverages and Tobacco

The slowdown in the inflation was mainly due to the decrease in the inflation in Alcoholic Beverages and Tobacco at 3.4 percent in May 2022, from 5.1 percent in April 2022. Also, contributing to the downward trend was the lower increments registered in the indices of the following commodity groups:

- Food and Non-Alcoholic Beverages, 4.5 percent
- Clothing and Footwear, 0.1 percent
- Housing, Water, Electricity, Gas, and Other Fuels, 1.7 percent
- Health, 0.1 percent
- Personal Care, and Miscellaneous Goods and Services, 0.2 percent

Meanwhile, indices of these commodity groups retained their previous month's inflation rates:

- Furnishings, Household Equipment and Routine Maintenance of the House, 0.1 percent
- Restaurants and Accommodation Services, 0.2 percent

On the other hand, increase was higher in Transport at 14.3 percent in May 2022, from 12.9 percent in April 2022.

Indices among commodity groups: Information and Communication; Recreation, Sport and Culture; Education Services; and Financial Services posted a constant inflation at 0 percent. *(See Table C)*

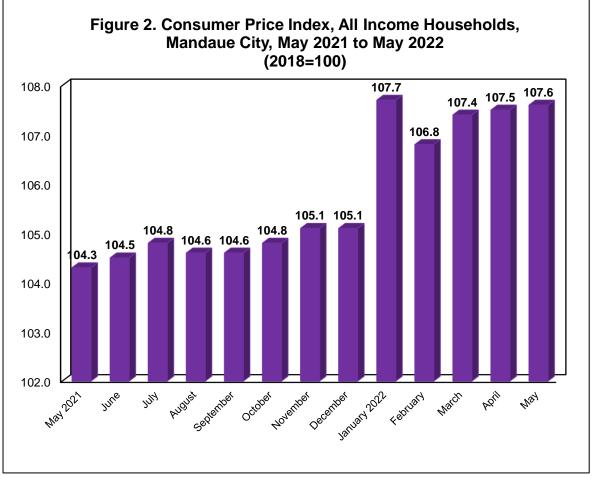

Table C. Inflation Rate for All Income Households, by Commodity Group,Mandaue City, April to May 2021 and 2022

COMMODITY GROUP		MAY		APRIL	
				2022	2021

Technical Notes:

The Philippine Statistics Authority generates and announces the monthly Consumer Price Index (CPI) based on a nationwide survey of prices for a given basket of goods and services. Two important indicators, the inflation rate and purchasing power of the peso (PPP), are derived from the CPI which are important in monitoring price stability and the value of the country's currency.

The Consumer Price Index (**CPI**) is an indicator of the change in the average retail prices of a fixed basket of goods and services commonly purchased by households relative to a base year.

Base Period/Base Year is the period, usually a year, at which the index number is set to 100. It is the reference point of the index number series.

Inflation Rate (IR) is equivalent to a decline in the purchasing power of the peso. It is the change in the CPI over a specific period of time (usually a month or a year). That is,

$$Inflation Rate = \frac{CPI_2 - CPI_1}{CPI_1} * 100$$

Where:

CPI1 - is the CPI in the previous period

 CPI_2 - is the CPI in the current period

The **Purchasing Power of the Peso (PPP)** is a measure of the real value of the peso in a given period relative to a chosen reference period. It is computed by getting the reciprocal of the CPI and multiplying the result by 100. That is,

$$PPP = \frac{1}{CPI} * 100$$
