Lapu-Lapu City's inflation is driven by Transport

The upsurge in the inflation was mainly driven by the increase in the inflation of Transport index from 14.2 percent in May 2022 to 16.3 percent inflation in June 2022. Meanwhile, indices of the rest of the commodity groups retained their previous month's inflation rates:

- Health, 0.6 percent
- Information and Communication, 0.1 percent
- Recreation, Sport and Culture, 0.5 percent
- Personal Care, and Miscellaneous Goods and Services, 0.2 percent

Indices among commodity groups: Clothing and Footwear; Furnishing, Household Equipment and Routine Household Maintenance; Education Services; Restaurants and Accommodation Services, Financial Services at 0.0 percent.

On the contrary, decrease in the inflation both recorded in Alcoholic Beverages and Tobacco at 1.8 percent in June 2022, from 1.9 percent in May; and Housing, Water, Electricity, Gas, and Other Fuels at 4.4 percent in June 2022, from 4.1 percent in May 2022. (See Table C.)

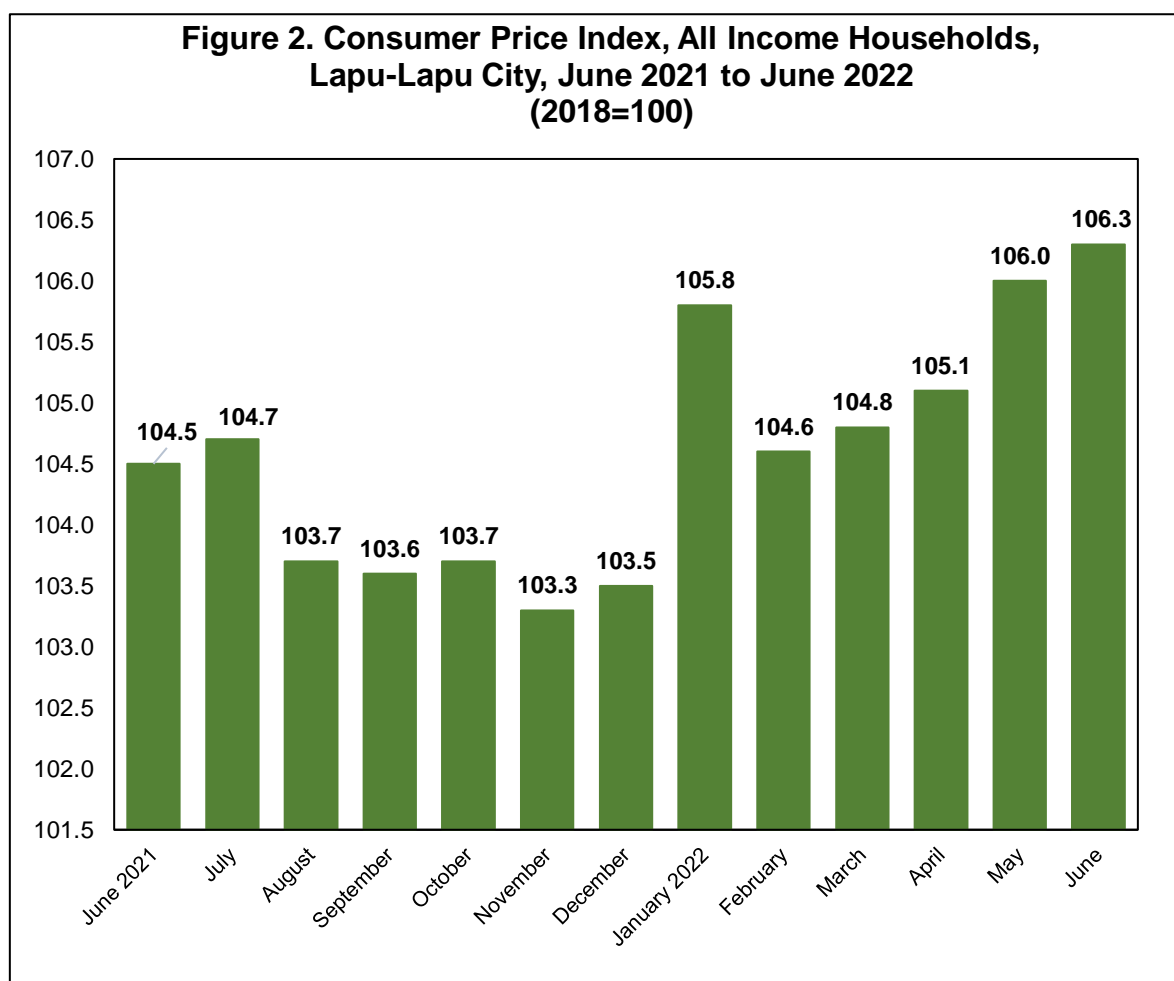

Table C. Inflation Rate for All Income Households, by Commodity Group, Lapu-Lapu City, May to June 2021 and 2022 (2018=100)

COMMODITY GROUP		JUNE		MAY	
		2022	2021	2022	2021
ALL ITEMS		1.7	1.1	1.5	1.8
1	Food and Non-Alcoholic Beverages	-1.6	-0.8	-1.9	-0.3
2	Alcoholic Beverages and Tobacco	1.8	6.1	1.9	6.8
3	Clothing and Footwear	0.0	1.0	0.0	1.0
4	Housing, Water, Electricity, Gas, and Other Fuels	4.1	0.9	4.4	1.3
5	Furnishing, Household Equipment and Routine Household Maintenance	0.0	3.8	0.0	3.8
6	Health	0.6	5.7	0.6	6.7
7	Transport	16.3	6.7	14.2	12.2

Technical Notes:

The Philippine Statistics Authority generates and announces the monthly Consumer Price Index (CPI) based on a nationwide survey of prices for a given basket of goods and services. Two important indicators, the inflation rate and purchasing power of the peso (PPP), are derived from the CPI which are important in monitoring price stability and the value of the country's currency.

The Consumer Price Index (**CPI**) is an indicator of the change in the average retail prices of a fixed basket of goods and services commonly purchased by households relative to a base year.

Base Period/Base Year is the period, usually a year, at which the index number is set to 100. It is the reference point of the index number series.

Inflation Rate (IR) is equivalent to a decline in the purchasing power of the peso. It is the change in the CPI over a specific period of time (usually a month or a year). That is,

$$\text{Inflation Rate} = \frac{CPI_2 - CPI_1}{CPI_1} * 100$$

Where:

CPI₁ - is the CPI in the previous period

CPI₂ - is the CPI in the current period

The **Purchasing Power of the Peso (PPP)** is a measure of the real value of the peso in a given period relative to a chosen reference period. It is computed by getting the reciprocal of the CPI and multiplying the result by 100. That is,

$$PPP = \frac{1}{CPI} * 100$$
