Technical Notes

The 2020 Census of Population and Housing (CPH) was undertaken by the Philippine Statistics Authority in September 2020 as mandated by Republic Act No. 10625, otherwise known as the **Philippine Statistical Act of 2013**. It was the 15th census of population and 7th census of housing that was undertaken since the first census in 1903. The 2020 CPH was designed primarily to take an inventory of the total population and housing units all over the Philippines and collect information about the demographic, social, economic and cultural characteristics and facilities of the housing units. The reference period for the 2020 CPH was 01 May 2020 (12:01 a.m.). The enumeration was delayed and conducted in September 2020 due to the pandemic problem caused by Covid-19.

Definition of Terms

Census of Population and Housing refers to the complete process of collecting, compiling, evaluating, analyzing, publishing and disseminating data about the population and housing units in the country.

Total Population is composed of household population plus the institutional population.

Population Growth Rate is an annual average rate of change of population size during a specified period.

Population Density is a measurement of the number of people in an area. It is calculated by dividing the number of persons by the area and is usually shown as the number of persons per square kilometer.
