Abing are shown here together with representatives from the four local government units during the CBMS Module II-B Training*

The Philippine Statistics Authority (PSA) Siquijor Provincial Statistical Office conducted a three-day statistical training for selected LGU staff from the Municipalities of Enrique Villanueva, Larena, Maria and San Juan of the province of Siquijor. This capacity-building activity was conducted by CBMS personnel on 24-26 July 2023 at the Philippine Statistics Authority Siquijor Provincial Statistical Office, Poblacion, Siquijor, Siquijor.

This capacity training intends to capacitate the local government units (LGU) personnel in tabulating and analyzing data obtained from the Community-Based Monitoring System (CBMS) conducted in August 2022 and March 2023 in Siquijor province.

**The CBMS Module II-B: Data Processing: Data Tabulation and Analysis Using Descriptive Statistics** was designed to develop one's skill in generating various types

of CBMS data tabulations using the Census and Survey Processing System (CSPro) and Microsoft Excel applications. Through this session, LGU personnel in the said municipalities will be able to generate CBMS data and use functional charts that would be useful not just for presentation purposes, but more importantly, for evidenced-based planning and program implementation at the local level.

With the commitment to aid in poverty alleviation and socio-economic development, the PSA is bolstering and sustaining its partnership with the LGUs in delivering quality and relevant statistics. This is through capacity-building initiatives such as this training that would serve the best interest of every Filipino in the development process.

This training module was developed in collaboration with the Philippine Statistical Research and Training Institute (PSRTI), the training arm of the CBMS per Republic Act No. 11315 or the CBMS Act. Other modules shall also be served to all CBMS implementing LGUs such as the uses and applications of CBMS data, and the management and security of the local CBMS databank.
