2017 ASPBI/SICT Respondents' Forum

The respondents' forum for the Annual Survey of Philippine Business and Industry (ASPBI) and Survey on Information and Technology (SICT) 2017 was held on May 31, 2018 at JJ's Seafood Village, Tagbilaran City. The occasion was graced by Engr. Ariel E. Florendo, the Regional Director of PSA region VII who gave an inspirational message. Also present were invited guests from representatives of the various establishments in the province of Bohol.

Speakers are from the PSA provincial office each with his/her own topic of information that will be discussed. The presentations included 2015 ASPBI and 2013 SICT results, background of the two surveys and filling up of online questionnaire.

An open forum followed after all the discussions. Guests were given certificates appreciating their cooperation and attendance. All posed for posterity and special tokens were given to all participants. ■

2017 Annual Survey of Philippine Business and Industry (ASPBI)

The Annual Survey of Philippine Business and Industry is a continuing activity of the Philippine Statistics Authority. It generates the essential statistics required for economic planning and analysis. It collects and generates information on the levels, structure, performance and trends of economic activities of the formal sector of the economy. But because most of the sample establishments unfortunately do not know the importance of the survey, they just take it for granted.

There are three phases of the operation, namely, Distribution, Collection and Data Processing.

During the distribution phase, the field personnel were very much excited of their assignments. Luckily only slight problems were encountered such as referrals to main office, stopped operation, Out of Scope establishments and erroneous assignment of forms.

After the tenth day from receipt of the questionnaires, the

collection phase started immediately. But sad to know no one was able to collect any questionnaire. Several follow-ups were made. Here started the calvary of the field personnel since most respondents will just say not yet filled up because the person-in-charge is so busy or always out of the office or they were not able to contact the bookkeeper yet. There were so many "Alibis".

For small establishments, the major problem is how to fill up the questionnaire since they have no background on bookkeeping. So as field personnel it is our responsibility to assist them.

The full implementation of Census Compliance Project (CCP) required issuance of notices of non-compliance as a friendly reminder. For this year, some establishment were already issued with three notices and two sample establishments were given a final demand letter.

For the third phase which is the Data Processing, several inconsistencies and lacking entries were found, so verification

needs to be done. Mostly, during this period you can not easily contact the person in charge especially if through phone calls only. Hence, for best strategy, visit the establishments personally during follow-up and verification periods so that they will act on it immediately. Be patient enough.

From the result of the 2017 ASPBI and SICT operation, there were several non-good questionnaires such as Out of Scope, closed or stopped operation, duplicate and referral to main office establishments. There were good questionnaires which did not undergo the data processing because it is the Central Office who will process it such as Change form or sector and Consolidated Reports.

Until now there are few sample establishments who failed to submit the questionnaires. Maybe the establishments need data dissemination or incorporate their commitment to comply the questionnaires on time in some local ordinances just to awaken them that it plays a vital role in our economy. ■

2017 Survey on Information and Communication Technology (SICT)

Information and Communication have vital roles in nation building and that it is the state's policy to "ensure universal access to quality, affordable, reliable and secure ICT services." The 2017 SICT aims to collect and generate information on the availability, distribution and access/utilization of ICT among establishments in the country.

Same procedures with ASPBI were adopted in this survey since SICT is a rider survey. The only difference is that, the questionnaire is more on checking the applicable answers and consistency

checking of some items but no computations are involved.

For the province of Bohol, a total of 77 out of the 283 ASPBI make up the set of sample establishments for SICT.

As of the end of June, the collection rate for the province posted at 55.26%, that is, 39 out of the 76 original samples. ■

1st Quarter QSPBI Notches 100% Collection Rate

The Quarterly Survey of Philippine Business and Industry (QSPBI) under the Macroeconomic Accounts Service is one of the components for the National and Regional Accounts of the state. Its insurmountable odds besetting our field collectors in dealing with the sample establishments responsible persons inking their data into our questionnaires has earmarked the target of hundred per cent collection rate for 2018 1st quarter.

ROI If Hibaya-Antopina, Provincial Focal Person of this undertaking, divulged that this is

not the first time PSA-Bohol achieved a perfect collection rate. It happens in many years when sample establishments religiously complies with the government-needed data before it struck a deadline in our timetable.

Partaking on this continued support for our Industry and Trade Statistics, Bohol Provincial Statistical Office laid bare their sense of gratitude to all those involved in the project especially people manifestly putting their time in scribbling numbers into the QSPBI questionnaires. ■

CPBI Phase 1 Enumeration – Touches Finish Line

One of the major activities of the PSA for this year is the 2018 Comprehensive Updating of the List of Establishments otherwise known as the Census of Philippine Business and Industry (CPBI) Phase 1. From the cradle of its inception until it flashes its data on the huge screens for analysis and implementations afterwards of its objectives by our captains of industry, government planners, gigantic corporate executives and ordinary stakeholders, it behaves odds at cross points, patience and endurance.

CPBI Phase 1 officially kicked-off when Office Memorandum 2017-097 was issued calling for the attendance to the Consultative Meeting last September 2017. Provincial Focal Person of this project in uttered obedience to the call of PSO Alcazaren together with two (2) participants from RSSO 07 and Cebu province flew on the scheduled date for the 2nd Batch slated on September 19-20, 2017.

Bohol Provincial Statistical Office made their 3rd Level Training on April 10-14, 2018 at Panda Tea Garden Suites with the PFP and SSS as trainers. Twenty five (25) hired field workers were listening intently and magnified their knowledge of the discussions on our Field Operations

Manual. They hurdled the 6-day live-out training with eagerness to be deployed immediately to the field whenever workload assignments in the Android-Tablet devices will be downloaded from the BRIMPS server and availability of its presence do not hinder its usage otherwise.

The office had started its enumeration on April 27, 2018 lagging ten days behind schedule because we desire rarely and live by the promise of the device to be used upon arrival. The ULE undertaking ended its enumeration last July 23 exactly as all data in the ULE apps has been uploaded to the server.

2018 Comprehensive Updating of the List of Establishments machine processed data via BRIMPS will soon be data reviewed and validated by the office in due time. ■

How We Manage and Control Non-Sampling Errors

At Philippine Statistics Authority (PSA) statistical world, one can arrive to best quality data if both sampling and non-sampling errors are clearly monitored and managed.

At our level in the field office, we are most responsible in dealing with non-sample errors and their control efforts. Methodology and design that dictate sample errors are taken care of at the central office with our statistics guru and consultants.

What is our understanding with these terminologies? Non-sample errors are largely attributed to the quality of training we conduct, correct implementation processes of enumeration, supervision effectiveness, manual and machine data checks. On the other hand, sampling errors are results from the reasonableness of the sample size.

And how do we manage at our level non-sampling errors in the conduct of surveys and censuses? Some strategies and positive points are adopted with a high level of confidence making sure quality is preserved with utmost security.

The following are the top 10 Best Practices in Bohol Province:

1. It all starts from recruitment; we institutionalize examinations especially for big projects and of course personal interviews so that screening of deserving field interviewers are tapped.
2. Improving the strategies in conduct of trainings, though we have not perfected this, yet they say "garbage in, garbage out". I always believe that near perfect quality trainings produce best results. Ideal innovation introduced by RD Florendo, is indicating High, Medium, Low to show one's level of understanding in all topics in the manual.
3. Supervision is another factor that must be followed religiously and crucial point is on the first ten days of the operation. The initiative of group-editing with Statistical Specialist Colita Montoya has been replicated with other

teams such that errors will be connected in the early phases of enumeration.

4. With the advent of new technology, millennials adapt to these text brigades relaying the updates or good practices of one individual/group. Facebook groups and pages are also created specifically to share varied experiences and candid moments in the field work.
5. Another best practice is that we have popularly known it as "Provincial Data Review". This caters interactions and intelligent sharing of the raw data validations before submitting to Regional/Central office. Information from Agricultural Promotion Center (APC), Office of the Provincial Agriculture and Fisheries (OPA) and Bureau of Fisheries and Aquatic Resources (BFAR) are also used to finalize data reviews.
6. Inputs gathered from Damage Assessment Reports, again is a helpful tool in the counter-checking of the data gathered from the field. We usually send key persons to visit strategic areas to verify the situation and record events and systems introduced by LGUs.
7. Proven and tested phases of manual and machine processing are top in the list in terms of quality checks. This is where inconsistencies on coding of variables are cross matched, reject listing are used to validate data and unacceptable values are verified in the field.
8. In establishment-based activities, respondents' forum is one effective way to gain full support from our respondents. In so far at Bohol province, annually we gather our sample respondents for a day sharing to them the objectives and importance of the undertaking and give updates on the latest results as well.
9. Adoption of Census Compliance Project (CCP). This compels hard-headed respondents, and with our partnership with the Bohol Prosecutors Office, we gained the full support from them and eventually submit the questionnaires to the office.

(Continued on page 10)

CES Bohol Slump by 10.41%

An overwhelming decline of ten point forty one per cent (10.41%) difference in response rate in the 2nd quarter of 2018 as it posted eighty five point forty two per cent (85.42%) of the overall response rate when Philippine Statistics Authority – Bohol Provincial Statistical Office conducted the Consumer Expectations survey last April 2018.

January 2018 CES recorded at ninety five point eight three per cent (95.83%). Underlying reason could be that month of April which is the survey month of the project is a summer period and some households drawn from the sampling frame has gone out to other places for their vacations, trips and other attributions.

A 12-day enumeration period commencing from April 2 till 14 excluding Sundays, PSA – Bohol utilizes its regular employee SA Beatriz H. Merlas a veteran interviewer from the former BAS to sprint the complete enumeration of the three (3) sample barangays/EA's to name: Dao, Tagbilaran City; Subayon, Bilar and Poblacion, Ubay.

Effective April 2018 round of this economic survey, it added a new section which the sample households will be asked on their debt situation

when the eligible respondent answers in the affirmative. Also, it added a question pertaining to the mode of remittance of the house member who is an Overseas Foreign Worker (OFW) i.e., Over-the-counter Banking; Over-the-counter Bayad Center/Remittance Agent; Online Banking; Electronic Money and Others.

PSO Alcazaren spells the objectives of the survey needed by Banko Sentral ng Pilipinas (BSP) such as the quick and regular assessment of the financial condition of consumers and economic condition of the country at present and in the near future, the consumers' confidence in terms of their income and expenditures as well as their outlook on key economic indicators closely monitored by the said entity relative to inflation, exchange and interest rates. ■

SA Betty Merlas conducted the interview of CES April 2018 at Dao, Tagbilaran City as she dashed the final league of the enumeration.

STATS IN A FLASH

Demography as of 2015	
Total Population	1,313,560
Male	667,430

Marriages	1,388
Deaths	837

Labor Force Survey-Philippine Competition Commission

The third level training on April 2018 Labor Force Survey with a rider survey on the awareness of a newly created agency, Philippine Competition Commission, was conducted on April 5-6, 2018 at Panda Tea Garden Suites, Tagbilaran City, Bohol. It was attended by SS II Fidel R. Antopina Jr., RO1 Epifania H. Antopina and AAVI Kevin O. Marasigan as the trainers and nine hired statistical researchers namely Carol T. Suarez, Rosana Sarigumba, Marichu Dospueblos, Sydney Don Ganzon, Agnes Tuba, Marjun Hibaya, Nely Yucof, Nilfa Calooy and Archie Claracay. Most of the hired statistical researchers already have an experience with this survey.

The topics include the implementation of the master sample, concepts and operational definitions of the survey. Issues and concerns in updating the master sample list was discussed first giving emphasis on how to proceed given different cases. Problems encountered during field operation, its solutions and actions taken by the ENs and supervisors' experiences on the past labor force survey undertakings were as well presented.

Trainers also oriented the enumerators on how to accomplish the LFS questionnaire with the use of the Computer Aided Data Collection System (CADacS) highlighting the Philippine Competition Commission (PCC) rider questions. Translation of the questions to our own dialect, cautious enough not to change its meaning and objectives, was a great problem - how to deal and ask the questions that it could be easily understood by the respondents especially to less educated people or for those who are living in remote areas where education is not a priority. Each enumerator was tasked to do his part for questions that need to have a "visayan" translation specifically on **Q7 & Q8, AWARENESS ON PCA PROVISSIONS and PERCEPTION ON ANTI COMPETITIVE BEHAVIORS**. Consolidation of solicited translations was done and encoded at the Provincial Office.

Throughout the training, all of them gave inputs and techniques on how they can perform the tasks effectively and efficiently. They even shared a copy of the common codes of the PSIC and PSOC in order for them to identify it quickly and to save more time in the field operation.

The enumeration for the 2018 April LFS round officially started on April 10, 2018 for April 09, Monday, falls on a holiday. Training, field operation and data gathering had a maximum of twenty (20) mandays including uploading of data files. There were 370 interviewed respondents, 40 vacant housing units and 43 permanently moved out respondents. This undertaking was made successful through the collective effort of the involved personnel. ■

Special Feature

ON LIFE IS NAUSEATIC TO BE

It isn't the principle that are
dentend
Nor has it give huge implication
for fading;
In the years that long had been
past blendend
For the society's terroristic at
least on all wading
Cause morals in every aspects
pervades.
As wickedness paths
approachend in constant
presence
Yes, truth slept when unthought
time; although it'll invade

By God's same quality to all
I submit to Him the sacredness
of my dignity
Knowing its identification like fat
-ball
The behind-the-same activities
would end eternally.
For it's like a gorgeous blue-bell
hang...
'Cause its essence was for
waiting?
Even in late hours that it should
be bang...

Ponder it; life of man's full of
miseries,
And consider it a boon to nature
That when time comes; the fate of
our anxieties
Will straight affect his humble
wisdom.
For it makes us drowsy, then;
falls to sleeping or boredom?
In vast quantity of exhaustion in
man's body-cultured
In every day's routinary
activities at its expensed
'Cause little have he thought
about how to dispense.

Second Round of Geotagging Up

In continuation of the Geotagging of Building Structures activity, PSA started to conduct the 2018 round this April. Prior to the field operation, the six hired Map Data Collectors (MDC) were trained during the 3rd Level Training at Panda Tea Garden Suites, Tagbilaran City, Bohol on March 12-16, 2018. The trainers were SS II Joseph Jim D. Abadingo of RSSO, Provincial Focal Person Venus P. Gloria and Map Data Screener (MDS) Maria Eden L. Macalos. Application of the concepts learned during the first three days was done during the field practice. Presentation of outputs were as well undertaken after the simulation activity.

For this round, the total workload for Bohol comprised of a total of 360 EAs. Based on the estimated number of buildings, it would take five months, that is, from April to August, for the data collection to be completed. This requires the MDCs an output of at least 150 buildings per day.

Two weeks after the training, April 2, 2018, the field work began. This gave enough time for the MDS to prepare project files to be downloaded to the tablets of the MDCs. Just like the previous round, the MDCs covered Tagbilaran City first. It took them more than a month to completely cover the capital city.

Evaluation and assessment of the first month of operation showed that it is difficult to reach the quota of 150 buildings per day. On the average, they can only tag 80 to 100 buildings per day depending on the proximity of the buildings, the weather, and the availability of the building occupants upon the time of visit.

As of this writing, the geotagging is still halfway through. With the deadline moved to October 31, it is still quite uncertain for the operation to be accomplished ahead of time given that there are barely two months left. ▀

Palay Price Soars in the 2nd Quarter of 2018

For the past two years, the highest farmgate price of dry palay posted in the second quarter 2018 at P22.98 per kilogram. In fact, the price range of palay was P21.70 to P23.78. This was observed in June 2018, when price climbed by P3.44 from the January 2018 level. This upward trend is usually true in the second quarter as peak of harvest falls in March.

Consequently, retail prices of rice also showed glaring increases which reached to as high as P48.00, P52.00 and P60.00 per kilogram for Regular Milled Rice, Well Milled Rice and Premium Rice respectively. ▀

2018 Group Learning Session and Workload Analysis

PSA Bohol aims to deliver relevant and reliable statistics and civil registration services to its clientele. For this to be achieved, it has to have a human resource with the right skills in the right place at the right time with the right attitude doing the right work with the right output. Hence, PSA Bohol conducted a two-day Group Learning Session and Workload Analysis on June 28-29, 2018.

Activities for the first day included presentation of accomplishments for the first semester of 2018, presentation of 2018 OPCR, presentation of best practices, workshop on workload analysis and planning of activities for July to December 2018. Every activity and presentations were done by group.

During the second day, presentation of workload analysis output and Google calendar were done. Highlights on Values Orientation Workshop, Updates on HR Policies and Accounting Matters and Highlights on Basic Customer Service Skills were also discussed. In the afternoon, team building activities and socials were done.

The two-day activity was a success, achieving its goal to empower the PSA Bohol personnel and bringing them back to the right track in properly performing their duties and responsibilities in order to achieve excellence. ■

PSA Bohol joins in Mobile Services

In line with the Presidential Proclamation no. 1106 declaring the Years 2015-2024 as CRVS Decade on August 20, 2015, "all agencies and instrumentalities of the National Government and Local Government Units including government-owned or controlled corporations, in consultation with the private sector, development partners and the citizenry are enjoined to actively support all activities and programs relevant to the "Get every Pinoy and Pinay in the Picture" initiative.

Provincial Government of Bohol through the Office of the Governor-Bohol Employment Placement Office (BEPO) conducts Mobile Services on National Agencies on May 18, 2018 at Bohol Employment Placement Office (BEPO), Ground Floor, Provincial Capitol Building. This One Stop Government Desk was participated by the Professional Regulation Commission (PRC), Philippine Statistics Authority (PSA), Land Transportation Franchising and Regulatory Board (LTFRB) and Philippine Postal Corporation (PHILPOST).

Type of Documents	Number of Requests Received
Birth Certificate	1,702
Marriage Certificate	324
Death Certificate	13
CENOMAR	361
TOTAL	2,400

The undersigned together with RO Gaudosa Oculares, RO Venus Gloria, RO Gerardo Binangbang, RO Felicitas Aranas and AO Mirafior Payot attended the whole day activity. Acceptance of SECPA request of (birth/marriage/death and CENOMAR) for the benefit of the Boholanos and beyond. The table on the left shows the breakdown of the applications received.

(Continued on page 10)

The VOW's of Us

The Civil Service Commission-NCR alongside with the PSA-HRD conducted a Values Orientation Workshop held at Quest Hotel and Conference Center, Cebu City on June 6-8, 2018. The three day activity was attended by 30 participants from PSA Regions 6, 7 and 8 and two from the Civil Service Commission namely, Thelma Pagtalunan Japzon, resource speaker and Joy as the secretariat. This activity promotes values clarification and commitment to one's set of positive value for setting of action plans geared towards effectiveness and productivity.

On the first day, participants were grouped into four, each group was assigned a specific flower and the name of the group must be an adjective that best describes the flower. Vibrant, Colorful, Resilient and Elegant were the names of each group. The first session was the **“Kumustahan at Lakbayan.”** The participants were asked to give expectations from the training staff and co-participants, what to gain/give from this workshop, what might be the hindrances for the success of the workshop and what changes in their selves and their companions would they wish to happen.

Next session is, **“Pakikipagtulungan”**, a game called Tower Building was played. The objective of this game was to test the participants what are the personal items they are willing to sacrifice in order to raise funds to buy the materials in building a tall and durable tower. Teamwork, cooperation and communication were the keys for this activity to be successful.

The third session was the **“Sino ako/Hiwaga ng Buhay ko”**, all participants were asked to continue incomplete sentences such as: My personal traits are, What I value most in life, The different roles/functions I perform in my life and Frustrations/Hurts in my life. The answers were shared within the group and then suddenly the vibe of the setting felt so heavy as emotions poured into every participants' answer. Mixed emotions were felt. After the sharing, something felt so different towards the co-participants, as if there were some kind of a door being opened. It felt like participants were able to connect, reflect, understand and knew who they are as a person and as an employee based on the sharing they gave. It was then followed by the Johari Window, where it examines ones sense of self-worth and to re-affirm one's self worth so as to better use of one's unique capacities and traits.

“Mangarap tayo/Sa totoo lang ganito 'yon” was the next session wherein participants were asked to write down the good things about the our country and the areas that need improvement. Filipino traits, culture, corruption, beliefs, discipline, peace and justice equality were highlighted during this session. It was followed by a creative presentation where each group was assigned for a specific topic, that is, **“Kaugalian at Tradisyon, Kasabihan at mga Kwento, Pook at Tao and Produkto at Industriya”**. Groups presented it as a role playing, dance presentation, song number and slide show presentaion, this was the **“Mabuhay ang Pinoy”** session.

The next session was the **“Tinig ng Bayan”**, the participants were grouped into five sectors of the community: the laborers, professionals, politicians, fishermen and farmers. In this activity, democratic process of decision making was the main issue and they showed how it is done here in the Philippines. **“Public Service, Luha at Ligaya, Professionalism and Empowering the Public Servant's Professionalism thru the Eight Norms and Ethical Standards (RA 6713)”** were the discussed by Ms. Pagtalunan. She identified employees who are being assertive, passive and aggressive which can affect the productivity of the office. A government employee must also posses the five dimensions of professionalism which are the specialized knowledge, skills, standards, spirit and the supportive environment in order to perform better and be more effective in providing quality service to the public. On the last day of the workshop, all participants gave their pledge of commitments as a government employee and as a Filipino citizen. ▣

(From page 4)

10. With the Bohol PIA headed by Sir Rey Chiu, our advocacy and info drive in all activities reached all Boholanos. Through *Kapihan sa PIA* radio program that is aired live at DYTR, we exchange ideas and updates on the importance of the survey or census the office conducts. Through our Information officer, Statistical Specialist Emanuel Galab, press releases highlight the advocacy and equally important milestones. This is in partnership with Bohol Chronicle, our local newspaper.

All of these little efforts rolled into one, did great jobs in realizing reliable and timely statistics, with utmost control and management of non-sampling errors.

Kudos to all of us and keep it up! ■

(From page 8)

Aside from walk-in applicants of SECPA, we also cater bulk requests from uniform and non-uniform personnel of Philippine National Police (PNP) from different police stations province wide which is needed for their updating of record of their beneficiaries. ■

Research and Statistics: a Closer and a “High-Tech” Perspective

The fun side of the world of statistics is sometimes unappreciated by some. This might be because of our seemingly “allergic reaction” when we encounter numbers. Though jokingly, numbers are always around the corner, haunting us wherever we go and whatever we do. But what’s even worse? Doing a research. A research involves more complex procedures wherein data analysis is among the essential and more critical parts.

Luckily, there is an answer to that imminent need. Strategic Research and Development Center, Inc. or STRAND-Asia offers a series seminar-workshops on statistics. One of which is the Research Writing and Statistical Analysis In-Depth Seminar-Workshop held on May 22-25, 2018 at DACS Training Center, Davao City.

There were more than a hundred participants to the activity. The class was a mixture of individuals belonging to different institutions like the academe, LGUs, NGAs and private enterprises. For PSA RSSO 7, five attendees were sent, with each province represented accordingly and one staff from the regional office.

The four-day workshop tackled highly technical topics in conducting a research. The first speaker, Mr. Rene N. Argenal of the University of San Carlos, had a comprehensive discussion on the step-by-step process and ethical standards in research writing. He also included topics on survey design, sampling, questionnaire construction, Chronbach's Alpha, and Data Analysis preparation.

Mr. Arturo J. Patungan, a professor at UST, was the resource person for the statistical analysis using IBM SPSS, a software widely used by statisticians for data compilation and analysis. The speaker presented the steps in performing factor analysis, cross tabulation, parametric and non-parametric tests, and multivariate analysis with regression using SPSS.

At the end of the seminar-workshop, the knowledge in statistical analysis of the attendees was refreshed, reinforced and enhanced. ■

PALABRA DE BETTY

ANG IMONG PAHIYUM

Ang imong pahiyum, susama ka puro sa kalamay nga hinimo sa mga jagnaanon ug ang imong pahiyum mas tam-is pa kay sa dugos nga pinuhag sa mga taga triple union

Apan ang imong pahiyum mas madanahun pa kay sa mga rosas nga anaa nagduyan-duyan sa tanaman sa paghandum
Mao kana ang larawan sa imong pahiyum
Nga sa mga buyog gihanduraw nga paga angkonon.

Usa niana ka dapit hapon, samtang ako naglakaw-lakaw
Sa lapyahan sa halapad nga baybayon
Nga naghanduraw sa ato kanhing mga mabolokon
Ug matam-is nga kagahapon

Nasaksihan ko ang mga mapintas nga mga balod o alon
Nga mikuso - kuso sa mga madanihong pahiyum
Nianang nahikatulog unta nga mga lusay sa bulawanong paglaum.

Apan ngano man? Ang imong pahiyum
Dili man mapanas sa akong galamhan
Hingtud pa sa tanan kong tinusbawan
Ikaw gihapon ang akong gilauman, bisan pa karon ikaw anaa na
Nagpauraray sa laing bulawanong mga dughan .

Igo na lamang ako sa paghanduraw, sa ato kanhing pahiyum
Nga atong gisaluhan sa tanang panahaon
Ilabina taliwala sa atong katulugon.
Unsay akong kasal-anan? Nga sa kalit ikaw nagmabalhinon man
Nga unta ikaw raman ang akong gihalaran
Sa akong gugmang mas halapad pa kay sa lawod sa kadagatan.

Unsa kaha ang akong dadangatan? Tungod niining akong kahimtang,
nga dili man ako mahimutang kay ang imong pahiyum
Manuhatsuhut man sa kinaugukan sa akong alimpatakan.

Oh! Akong pinalangga, hinaut pa unta, nga inigsuabang
Nianang bidlisiw nga bulawanong adlaw, ikaw unta mudungaw
Sa bintana sa imong harianong pantaw
Aron dili lamang ako igo sa paghanduraw
Kon dili sa pagtan-aw gayud sa imong pahiyum
Nga dili ikatandi sa bisag unsang gahum nga anaa niining ibabaw sa
kalibutan nga puno unta sa mabulukong paglaum.
